virotype PRRSV NA/EU Positive Control	(30)
Cat. no.	PC282335
Number of reactions	30

PRRSV NA/EU Positive Control	1 x 240 µl
------------------------------	------------

Intended use

The virotype PRRSV NA/EU Positive Control contains synthetically derived RNA from *Porcine Reproductive and Respiratory Syndrome Virus* (PRRSV) of the North American (NA) and European (EU) genotypes. This product can be used as a positive control in real-time RT-PCR.

For research use only. This product is not intended for the diagnosis, prevention or treatment of a disease.

Preparation of PCR setup

Before use, thaw the reagent and spin down briefly.

It is recommended to use 8 µl of the virotype PRRSV NA/EU Positive Control per 25 µl PCR reaction.

Quality Control

Each lot of this product was manufactured and released in accordance with INDICAL's ISO-certified Quality Management System.

Storage and handling

Upon receipt, store the material at -30°C to -15°C, away from any sources of contaminating DNA or RNA, especially amplified DNA products and material used for PCR master mixes. Use aerosol barrier pipet tips for pipetting. Do not use after the expiration date printed on the label.

Avoid repeated thawing and freezing because this may reduce performance. If used intermittently, aliquot the material and freeze.

Safety information

When working with chemicals, always wear a suitable lab coat, disposable gloves and protective goggles. For more information, please consult the appropriate safety data sheets (SDSs). These are available from your regional sales manager or at **compliance@indical.com**.

All sample residues and objects that have come into contact with samples must be decontaminated or disposed of as potentially infectious material.

Warning and precautions

Dispose of all materials in accordance with national and local regulations.
